The Society for Human Ecology (SHE) is an international interdisciplinary professional society that promotes the use of an ecological perspective in research, education, and application.

SHE's goals are to:

- Provide a forum through which scientists, scholars, educators, and practitioners may exchange ideas and information.
- Promote the advancement of an ecological perspective in interdisciplinary studies and practice.
- Identify problems, discover their origins, examine possible solutions and their implications, and then make recommendations for implementing those solutions.
- Look ahead to the consequences of human action on our social, natural, and built environments.
- Build cooperative arrangements among human ecology programs and organizations throughout the world.
- Facilitate the exchange of this information throughout an international network of individuals interested in human ecology.

The Society holds regular conferences, conducts workshops and symposia, and co-sponsors a variety of related activities to further integrate work among professionals

in fields pertaining to human ecology. SHE is an affiliate of
